ENDOSCOPIC & ROBOTIC HEAD & NECK SURGERY DISSECTION COURSE

: PRE CONGRESS HANDS-ON COURSE
OF THE 2015 INTERNATIONAL CONGRESS OF KOREAN SOCIETY
OF OTORHINOLARYNGOLOGY-HEAD & NECK SURGERY

in conjunction with
89th Annual Congress of Korean Society of Otorhinolaryngology-Head & Neck Surgery
2015 Spring Meeting of Korean Society of Otorhinolaryngologic Clinicians

2015 KORL-HNS  April 24(fri)~26(sun), 2015

April 24, 2015
Severance Robot & MIS center, Yonsei University Severance Hospital, Seoul, Korea
Endoscopic surgery : Maximum 2 people / USD 1,500(person)
Robotic surgery: Maximum 4 people / USD 2,000(person)
Non-dissector (Observation): Maximum 10 people / USD 100(person)

Organized by
Korean Society of Otorhinolaryngology-Head and Neck Surgery
WELCOME REMARKS

Dear Colleague,

We are happy to introduce to you the Endoscopic & Robotic HN Surgery Dissection Course organized by Korean Society of Otorhinolaryngology-Head and Neck Surgery. The course will be held on 24th April, 2015 in Seoul, Korea.

This course will cover all aspects of current minimally invasive head and neck surgery, providing an opportunity to demonstrate and experience the surgical techniques. This fresh, frozen cadaver course will be divided into three separate programs: Endoscopic dissection course, Robotic dissection course-I and Robotic dissection course-II. Participants can choose one of the programs and surgical approaches according to their preference. All of these dissection courses will be tightly supervised by superb HN surgeons. This advanced dissection course will be focusing on the more recent, novel techniques of minimally invasive surgeries. The emphasis of this course is to maximize individual dissection time with demonstration-guided stepwise procedure of the surgery. The course will consist of detailed lectures, demonstrations and dissections on frozen corpses.

We hope you will join us for this exciting program that can ultimately result in better outcomes and quality of life for many of your patients.

Thank you.

Course Directors: Kyung Tae, MD, PhD
Chairman, Board of Directors,
Korean Society of Otorhinolaryngology
- Head and Neck Surgery
Professor, Department of Otolaryngology
- Head and Neck Surgery, College of Medicine,
Hanyang University, Seoul, Korea

Eun Chang Choi, MD, PhD
Professor & Chairman,
Department of Otorhinolaryngology,
Yonsei University College of Medicine
Director,
Department of Otorhinolaryngology,
Yonsei Head and Neck Cancer Clinic
Severance Hospital, Yonsei University Health System

INFORMATION FOR APPLICATION & AREAS OF ENDOSCOPIC & ROBOTIC HN SURGERY DISSECTION COURSE TO BE COVERED

- Currently there are 6 places available for dissectors (2 places for Endoscopic surgery / 4 places for Robotic surgery) and 10 places for non-dissectors (Observation).
- Dissections will be on fresh frozen cadavers.
- Each two dissectors will share one cadaver (One side of neck dissected per delegate).
- From the two different dissection courses, only one should be selected by applicants before registration.
- All dissectors will have the opportunity to perform head and neck operations under professional supervision on fresh frozen cadavers.
- The course is aimed at trainees of all surgical specialties with an interest in head & neck surgery. However, dissection courses for robotic surgery will be open primarily to trainees who have experienced sorts of Robotic HN surgery or have received Basic and/or Advanced training course with da Vinci system while non-dissector (Observation) places will be open to all.
- All participants will have the opportunity to learn basic skills in endoscopic & robotic head and neck surgery in this dedicated dissection course. A great opportunity to learn the up to date technique of Endoscopic or Robotic surgery will be offered in advanced course (Endoscopic or Robotic surgery course). Participants can practice a variety of HN surgeries, especially TORS, endoscopic or robotic thyroidectomy, SMG excision and neck dissection via transaxillary or retroauricular approach.
- Instrumentation : Depending on the surgeon's preference, Ligasure or Harmonic scalpel dissection can be performed
